

MedAccess Contract Offer Agreement

Dear Khayyam Saleem,

Please see the following two agreements below and choose, or decline, offer A or B:

A- Per Project Service Fee:

- Complete MedAccess Prescription Drug Plan (PDP) Finder Tool (focus only on steps 1-13, ignore screen interface sections) \$225
- Complete MedAccess Copay Tool (focus only on steps 1-11, ignore screen interface sections) - \$150
- Complete MedAccess Medicare Advantage Prescription Drug (MAPD)/PDP Cost Tool (focus only on steps 1-7, ignore screen interface sections) - \$75

Note:

- The last two tools are essentially repeats of the first tool (PDP Finder tool), and should take you less time than the first tool.
- The amounts above will be given after each completed project is sent over and tested via Python on my end. For example: If you complete the first tool, I will have to test the tool on my end so that it works for a patient taking one drug or taking 10 different drugs before you receive a service fee.
- Payments are in the form of Venmo, or mobile banking app transfers.
- When creating the tools, the steps are hypothetical so that it should work with any drug approved by the FDA, or plan the patient currently has.

B- Equity:

The issuer, Paul O. Oyefesobi, offers Khayyam Saleem 10% (**ten percent equity**) in exchange for completing any ongoing software/programming related tasks from here on out including, but not limited to:

- Python program – developing further tools downstream
- SQL program – for user database management, managing user servers, etc.
- iOS/Android app development (once tools are ready to be used by patients)
- Troubleshoot any information technology related issues, or any updates needed in the present or past tools created

- SAS program – for providing predictive analytics to pharmaceutical companies (this service will not be needed, realistically, until 3-4 years down the road to achieve a sizable daily active user database or >100,000 users).

Note:

- The idea is that I, Paul Oyefesobi, would strategically build up the company to eventually value the company to 6 or 7 figures. For example, if the company has a valuation of \$500,000 three years down the road, you legally have 10% ownership/stake in form of shares totaling \$50,000. You take your cut during an exit point (sell out of the company), or large seed rounding valuations of *no more than \$1,000,000*. Beyond the \$1 mil valuation, I would contract you out (if you are comfortable with SAS).

I, KHAYYAM SALEEM (print name legibly), select offer (A) . By selecting this offer I agree to the terms above, and am legally obligated to receive the financial stipulations. If the program does not work as needed from Paul O. Oyefesobi, with regard to Offer A, I understand that there may be a delay in my service fee for up to 2-3 business days to correct any necessary bugs in the program. I, KHAYYAM SALEEM (print name legibly) understand the following: *This message (including all shared documents or attachments) may contain confidential, proprietary, privileged and/or private information. The information is intended to be for the use of the individual or entity designated above.
